

Trees in Boston's Future

We're helping to steer Boston's Climate Future

SFTT is part of The Boston Foundation's "Climate Progress Report" Steering Committee

The Boston Foundation recently announced a new project: the Boston Climate Progress Report - **and we're proud to be on the Steering Committee!**

This report is the culmination of years of discussion with the Environment Department in the Boston Mayor's Office and their partners at the Green Ribbon Commission. The genesis of this report was the City of Boston's climate resiliency plan and its reputation as a leader in advancing city-based climate action. We're excited for the opportunity to share in our expertise of how trees can be part of a future rooted in climate justice and equity.

The research will be led by an amazing team at Northeastern University: Joan Fitzgerald, Ph.D., Professor of Public Policy, Ted Landsmark, Director, Dukakis Center, and Kaitlyn Alarez Noli, Assistant Professor of Public Policy and Health Sciences. Joining them is Michael Jay Walsh, Ph.D., Independent Consultant.

The Boston Climate Progress Report is set to be released at a forum towards the end of this calendar year. [Stay informed by joining TBF's mailing list.](#)

We're Hiring!

Community Tree Specialist

Speak for the Trees is seeking a Community Tree Specialist to lead the organization's projects related to tree siting, tree planting, and tree care. This will include selecting sites for tree planting, determining the best tree species for each site, and developing programs to support training of staff and volunteers on best practices regarding tree planting and tree care. Meet our new Spring TUTC Team Leader

Angelica Pham

We're excited to welcome Angelica as she returns as a Team Leader for our TUTC program! Angelica was born and raised in Dorchester and will be joining Yale University's Class of 2026. She was part of the Teen Urban Tree Corps in 2020, and she is excited to return to TUTC.

As a Team Leader for the spring semester she hopes to help young people uncover the wonders of trees for public health and feel empowered to improve equitable tree cover through urban forestry.

Join us in growing Boston's urban forest
